**33.** (Previously cancelled)

**34.** (Previously cancelled)

**35.** (Cancelled herein)

**36.** (Cancelled herein)

**37.** (Cancelled herein)

**38.** (Cancelled herein)

**39.** (Amended herein) A computer-readable memory device on which is stored instructions, said instructions implementing a method of providing Internet content to a user of a computing device, comprising:

receiving a request from a computing device;

in response to the request, retrieving data ~~that is programmed in a format readable by a Web browser program, the data comprising:~~

instructions for, programmed in a format readable by a Web browser program,  
said instructions;

invoking a computing device resident process and for obtaining  
content data, in a format readable by a Web browser program, from a  
device other than the client device; and

to be displayed displaying said content, at the computing device,  
independently outside of a window of a Web browser program in response  
to execution of said computing device resident process; and

a definition that defines at least in part a functionality and an appearance of a user interface outside of a window of a Web browser program and which includes a  
frame within which the results of the computing device resident process are  
presented in response to execution of said computing device resident process; and

transmitting the data to the computing device.

**40.** (Cancelled herein)

**41.** (Cancelled herein)

**42.** (Amended herein) The method computer-readable memory device of claim 39, wherein the definition is provided by a Web content provider, thereby enabling the Web content provider to control at least in part a functionality and an appearance of the user interface when rendered on the computing device.

**43.** (Amended herein) The method computer-readable memory device of claim 42, wherein the computing device resident process, content data, and the definition are provided by the Web

content provider, thereby enabling the user interface to integrate seamlessly with the results of the computing device resident process and content data.

**Claims 44-57.** (Previously cancelled).
